

Viewing Client Computer

VSC-4x00-01

- Intel Core i7
- Multiple monitor support
- Day/night HD and thermal imaging
- Windows 7, 8, or 10
- Rack-mount or tower form factor available
- Redundant power supplies available

High performance computers for IVC View Station software

The VSC-4x00-01 series View Station computers are designed to provide an ideal viewing platform for medium to large camera systems. The computers are configured with an Intel Core i7 processor, 4GB to 8GB of RAM and 2 or 3 AGP graphic cards, each with 1 GB of RAM and capable of supporting 2 monitors.

When used with IVC's View Station software, these View Station computers provide flexible and robust viewing access to a network of video cameras

connected to IVC's Relay Server software. The computers are available with either Windows 7 Professional or Windows 8 Professional operating system pre-loaded.

To satisfy most application environments, the VSC-4x00-01 series are offered in a tower or rack-mount case. You may also optionally have IVC pre-load and pre-configure the View Station software to expedite the installation of your camera system.
