

FOR IMMEDIATE RELEASE

Industrial Video & Control Adds Stainless Steel, High-Definition, IP Video Camera to its Line of Certified Products

Manufactured in the US, the APTZ-3045-07 combines broadcast-quality video and excellent low-light performance in a rugged enclosure, for reliable monitoring in harsh and hazardous conditions

Newton, MA – January 20, 2016 – Industrial Video & Control (IVC) announced today its APTZ-3045-07 high-definition, IP video camera for reliable process, safety, and security monitoring in harsh and hazardous environments. This rugged pan/tilt/zoom camera offers 1080p resolution and excellent low-light performance at a low price point.

Tested and certified Class I Division 1, the APTZ-3045-07 provides high quality video in areas where ignitable concentrations of gases or liquids exist. Devices classified as Class I Division 1 must also be incapable of causing ignition of a mixture of flammable or combustible material.

“The APTZ-3045-07 is designed to work flawlessly in a range of tough conditions – extreme weather, corrosive environments, and hazardous areas,” said Clarke Esler, Director of Marketing. “When used with IVC’s camera management software, it provides an ideal solution for process, safety, and security monitoring applications.”

Manufactured in the US, the APTZ-3045-07 is a rugged, color, IP video camera mounted in a stainless-steel pan/tilt/zoom unit. The 1080p HD camera provides 30x optical zoom. It automatically switches to black and white and removes an IR cut filter to increase sensitivity in low light conditions.

The APTZ-3045-07 works with IVC’s full line of video management software offerings including the IVC Relay Server and IVC’s Longwatch camera management software. The camera also integrates easily with 3rd party video security systems or can be operated through a user’s SCADA system. The APTZ-3045-07 will be available Q2, 2016.

About Industrial Video & Control Company

Founded in 2001, Industrial Video and Control is a leading supplier of cameras and video management software specifically designed for industrial applications. The company’s IP-based video solutions are used by customers worldwide for process evaluation, remote monitoring, personnel safety, site security, and regulatory compliance. IVC’s success in the market has been driven by high-quality products, cost-effective solutions, and outstanding service. Based outside Boston, MA, IVC is an ISO 9001-certified company.
